(54) Title: DRIVE AND METHOD FOR SIMULATING THE INSERTION OF A NEW RECORD CARRIER

WO 2005/085988 A3

(57) Abstract: The present invention relates to a drive (2) for use in a computer or a reproduction device for accessing a record carrier. According to the invention via a specific action, supervised by the drive (2), the drive mimics the presence of a disc by sending a disc insertion message to the host (3). After that the drive (2) will give the host (3) (the virtual) file system contents of the virtual disc, which, for instance, contains a link to an auto-run file. This auto-run file tells the host (3) to perform certain actions, such as going to the specified internet site or executing a file from the virtual disc.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
